

July 25, 2023

Dr. Takeshi Matsumoto
President, National Hemophilia Network of Japan

Dear Dr. Matsumoto,

In 2022, Japan Blood Products Organization (JB) generously donated 1.6 million IU of Plasma Derived Factor VIII, brand Cross Eight MC, to the World Federation of Hemophilia (WFH). The WFH would like to extend its sincere gratitude to the National Hemophilia Network of Japan and to you personally for supporting this initiative and for your effort in making this donation a reality.

The WFH is an international, Canadian based, not-for profit organization with a membership of 147 countries, officially recognized by the World Health Organization (WHO). It has been dedicated to improving hemophilia care worldwide for the last 60 years.

The WFH is working hard to fulfill its vision that one day, treatment will be available for all those with bleeding disorders, regardless of where they live. Thanks to the generous donation from Japan Blood Products Organization, we are one step closer to fulfill this vision since more than 100 patients in Bangladesh, Cambodia, Mongolia and Nepal have benefitted from treatment.

We very much appreciate your continued support and look forward to continue this project throughout 2023 and beyond.

Kind regards,

Assad Haffar
